Last updated on: From the section Football Simon Francis, left, celebrates with Luke Rowe after scoring against Norwich City in the FA Cup semi-final second leg at Wembley last season The former Newcastle defender Simon Francis is joining Preston North End. The 29-year-old joins on a free transfer following his release by the Magpies and has signed a deal until June 2017. The 5ft 10in defender has featured in the Premier League and FA Cup for Newcastle and had loan spells at Huddersfield Town and Notts County. His Preston deal is subject to approval from the Football League.

Q: Gridview Checkbox to set edit record state? I have a gridview, where each row contains a checkbox. When the user checks this checkbox, I want to change the row's IsEdit property, from false to true, and then save the record. What is the best way to do this? A: You will need to hook up your own button that you can use to set the values. Then in the Click event, call the Update command on the database to save the changes. I don't know what the name of the button is, but I'll put the code for setting the record to True:

```
protected void cb_CheckBoxName_CheckedChanged(object sender, EventArgs e) { //This will set the current row to being Edited GridViewRow row = ((CheckBox)sender).NamingContainer as GridViewRow; //Find the Edit button on the row Button btnEdit = row.FindControl("EditButton") as Button; if (btnEdit!= null) { // 82157476af
```
